

RAGHAVENDRA D C

Full-Stack Software Engineer | React.js | TypeScript | Node.js | Playwright

Bengaluru, India | +91 8197917381 | raghavendraddc@gmail.com | linkedin.com/in/raghavendra-dc-761414181

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 5.5+ years of experience building scalable enterprise web, mobile, and telecom applications. Strong hands-on experience with React.js, TypeScript, Node.js, Express.js, MongoDB, REST APIs, React Native, Playwright, AWS, Docker, OpenShift, and CI/CD. Experienced in production delivery, performance optimization, and microfrontend architecture. Open to relocation across Europe and employer-sponsored work authorization.

PROFESSIONAL EXPERIENCE

Specialist Software Engineer

LTM Limited

03/2026 – Present | Bengaluru, India

- Develop enterprise Digital Experience applications using React.js, TypeScript, Node.js, Express.js, and MongoDB.
- Build reusable React.js components and contribute to microfrontend architecture for modular web applications.
- Design and integrate REST APIs and backend services supporting frontend and business workflows.
- Develop Playwright end-to-end test cases for critical user journeys, regression testing, and release validation.
- Improve application performance, accessibility, SEO, responsive behavior, and reliability.
- Collaborate with backend, QA, DevOps, and product teams on CI/CD, deployments, troubleshooting, and production improvements.
- Use AI-assisted development tools for debugging, refactoring, documentation, and code optimization.

Technical Lead

Comviva Technologies

09/2021 – 02/2026 | Tunis, Tunisia

- Led backend and full-stack delivery for telecom self-care platforms supporting millions of users across Ooredoo Tunisia and MTN South Africa.
- Developed Node.js and Express.js services for recharge, gaming, loyalty, bundles, payments, and self-care capabilities.
- Built and optimized REST APIs using Node.js, React Native, MongoDB, MySQL, and Progressive Web Application technologies.
- Improved application performance through database tuning, API optimization, caching, and frontend performance enhancements.
- Managed Docker-based CI/CD workflows, OpenShift deployments, release activities, and AWS services including EC2, S3, IAM, and RDS.
- Reduced platform downtime by 30% through deployment improvements, monitoring, and production reliability practices.
- Implemented authentication, encryption, input validation, logging, and monitoring to strengthen application security and reliability.
- Collaborated with frontend, QA, DevOps, and product teams in Agile delivery cycles and supported production releases.

Automation Developer

Aryaan Solutions

07/2019 – 05/2020 | Bengaluru, India

- Developed ABBYY FlexiCapture automation workflows that reduced manual data-entry effort by 60%.
- Standardized automation frameworks and created reusable components across GBP, NAM, and EMEA regions.
- Supported developer onboarding and knowledge sharing to improve team productivity.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3

Frontend: React.js, React Native, Progressive Web Applications (PWA), Microfrontend Architecture

Backend: Node.js, Express.js, REST APIs, Microservices, Authentication & Authorization

Testing: Playwright, End-to-End Testing, Test Automation

Databases: MongoDB, MySQL, Redis

Cloud & DevOps: AWS, Docker, OpenShift, CI/CD

Tools: Git, GitHub, Postman, Jira, VS Code

Development Practices: Agile, API Optimization, Performance Optimization, Production Support

KEY PROJECTS

Dotcom Next — Digital Experience Platform

- Develop and enhance enterprise Digital Experience capabilities using React.js, TypeScript, Node.js, Express.js, and MongoDB.
- Build reusable UI components and contribute to microfrontend architecture for modular web applications.
- Develop and integrate REST APIs supporting frontend and business workflows.
- Write Playwright end-to-end test cases for critical user journeys, regression testing, and release validation.
- Improve application performance, accessibility, SEO, responsive behavior, and reliability.
- Collaborate with QA, DevOps, backend, and product teams across development, CI/CD, and production releases.

Ooredoo Tunisia — Telecom Self-Care Platform

- Contributed to a high-availability mobile application supporting 2M+ users across telecom self-care services.
- Developed Node.js APIs for recharge, gaming, loyalty, bundles, customer self-care, and related digital services.
- Supported production reliability through API optimization, database tuning, caching, CI/CD, OpenShift deployments, monitoring, and release management.

MTN South Africa — Telecom Self-Care Platform

- Contributed to backend and mobile capabilities for a large-scale telecom self-care application serving millions of users.
- Worked with Node.js, React Native, REST APIs, databases, deployment workflows, and application performance optimization.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Science — MVJ College of Engineering, Bengaluru | 2016 – 2019

CERTIFICATIONS

- Full Stack Developer (MERN) — Comviva Technologies
- React Native Practical Guide — Udemy
- React JS MasterClass — Udemy
- Web Application Development — Mitra Software, Shivamogga
